> - K

PS: Yasser, if you don't get results with the first EDS directly on the mobo - try each and every MEC (or whatever interface you have) in turn with that EDS. Make sure you cycle through \*their\* cables too.

This may sound a bit slow - but it's going to be thorough. You'll know where it is at the end of this.

- KHi Yasser,

I can say that I had your exact same symptoms before I was told to put the second mec attached to the last eds card in the chain.

4 cards Mec A attached to Card A (submix A)  
Mec B attached Card D (submix D)

Audio miraculously appeared while recording after the change for me.

Try it if you haven't already and good luck!
