acks making these

> features all but useless

> <http://www.cubase.net/phpbb2/viewtopic.php?t=62911&highlight=>

This works fine here. What are you doing specifically? I added 10 mono audio tracks, put them in a folder, linked 4 of them in the mixer, enabled record on the folder (all 10 tracks), recorded audio on all 10.

>

> Sends to Stereo Group Tracks

>

I read this thread but I don't understand why you are trying to pan the kick hard left.

Remember, you are working with bus groups and internal panning, not panning to ASIO driver

outputs as you would for a mixer. Stereo groups works fine. I sent some of the mono tracks above

to a stereo group, panned them and they came out panned in the group. A stereo group is a stereo sum of any tracks you send to it. What's not working for you?

c.php?t=63202&highlight=

Confirmed. I hadn't run across this in other projects, but did recreate it on a different machine.

Not sure what to tell you - this does work here. Try creating an empty project,

add 10 tracks, add a folder, move to folder, link any of the tracks, record enable all

(or the folder) - record. If that doesn't work, then something could be buggy with the install.

Maybe there is something else you are doing in the process that I'm not that is causing this.

"Record enable selected channel" of course has no impact here, so that isn't it, and it shouldn't be related.

I understand now - sorry John, I didn't catch on at first. Yes, it should.
It's broken in C4.
Works in Nuendo 3.2.

No doubt C4 needs some work. Great potential, once it all works correctly.

Regards,
Dedric

we had this conversation a month ago and with UAD =
=3D
>version 4.4

>my latency changed and you agreed. At that time, I went back to 4.3 =
and
=3D
>all was better.

It was some one else that thought they were different...I said they =
were
the same.

>Have you been using 4.4 or 4.5 with all the same settings?

I'm using 4.5 with the same settings.

>Maybe because the presets are gone Sampleslide is not set correctly?

This would be my guess.

>Can you enlighten me on exactly the right method with the the =
wrapper? =3D20

- 1.Remove UAD using control Panel (may not have to do this)
- 2.Install new UAD software
- 3.Go to My computer/hardware device manager/DSP accelerators and very =
drivers
are updated for=20

each card (they usually aren't) uninstall drivers and re-install new =
version
drivers

- 4.Restart
5. If you didn't already load new drivers, windows will prompt you at =
this
time. If you want to=20

do the automatic add thing...make sure you have all previous UAD =
versions
deleted off your C=20

drive or it will just re-load old drivers.

- 6.Authorize any new plugs
- 7.Open FXpansion
- 8.Remove powered plugins folder (assuming this is where the UAD stuff =
is),don't
close or click=20

OK at this time.
re-add powered, don't add vst suffix, disable midi, DO NOT CHECK THE =

RESCAN
PLUGS OR FORCE=20

RESCAN FAILED PLUGS BOX (this is a sure fire way to loose presets)
that's it

Note....starting with 4.5 you will get (I do anyway, in Paris)an error =
that
says the Fairchild=20

mono and EX M plug is not installed. To defeat this, install 4.5 =
again, specifying
a folder=20

other than the correct folder (you will delete it later) and select =
the "install
mono versions"
box. Go into the mono folder that's in the folder you chose, copy the =
Fairchild
and EX-M DLL's
(there the only ones that don't have the word (mo
