arget="_blank"> http://chnm.gmu.edu/digitalhistory/links/cached/preserving/8
_1b_discrot.htmJeff..it was just the package labeled "freebies" from chuck, before everything
was free. I can't remember what was in it.

Other than that there was one specific setting at the extreme range of FreakQ,
and another extreme setting on No Limit that would cause problems....but
you'd know immediately about it, by the weird sound coming out.

Hi gang...What do I need to run a dual monitor set-up? Is it a special =
video card? thanks

"Tom Bruhl" <arpeggio@comcast.net> wrote in message =
news:45655b61\$1@linux...

I am thinking about adding a couple of 19"-20" LCD monitors to my pair =
of 21" CRTs.

I want to use 1280x1024 in a four monitor setup. I'm looking in the =
\$250 or less range.

Here's a few questions for those that know the answers.

Is there any benefit with Paris using ' widescreen ' format monitors?

What parameters are most important for quality using Paris and =
Cubase?

Maximum resolution

Pixel pitch

Response time

Brightness=20

Contrast ratio

Viewing angles (Mine will be no more than 90 degrees =
horizontal.)

Color support

Scan range

Native resolution (How does this play into my 1280x1024 =
usage?)

Any brands to stay away from or go to?

A few I'm looking at:

This seems the best price/stats wise:

=

[http://www.tigerdirect.com/applications/SearchTools/item-det
ails.asp?EdpN=o=3D1870817&CatId=3D170=20](http://www.tigerdirect.com/applications/SearchTools/item-details.asp?EdpN=o=3D1870817&CatId=3D170=20)

These are all okay I guess:
