>nah, it doesn't bug me, i love my digimax'sMike, it seems that you have nailed it with this last one:-)

Have tested starting Paris a couple of hour without any freezing or hickups at all with C16 on my AMD Quad-Core Phenom Black Edition 9850 machine with 4 GB RAM in WinXP. It seems that THG Task Assignment Manager minimized with Paris locked to processor 4 (3 in TAM that's seeing the first processor as 0.) is working like a champ. I also tested a little bit with a couple of old project, that seemed to work normal.

I don't use IFCT at all to get the Scherzo driver use 1 CPU, since it allways couldn't start Paris that allways showed up with the 1/1 fault.

So it seems the waiting time is over to use Paris with modern double, triple or quad CPU's. Again thanks Mike, for your work to give Paris a longer life:-)

Erling
