To my ear the effects sound good, and there certainly is a fair selection of
them,

and they can be used in Nuendo as plugin fx, reducing load on the CPU.
I dont summ to the card because my mixes are mixed internally to wav files
and married to picture.
The EMU card, (I only have the 0404 which has all the same features but only
2 ins/outs) is/was (I now have a Delta 1010 which I don't think sounds as
good, and it's unbalanced), my main Audio card.
I've actually got to return the Delta card because one of the output
channels is history, (no tops at all...like a sub), and also clocking noise
when the mouse is used and just general noise.
Doesn't seem to be recorded though, a bonus I guess.
I sold my Paris about a Month ago so these cards are all I have now.
