>Everyone I know that kept up with the upgrades and went with full blown PT rigs to support

higher track and plugin counts (as many as we get with native) spent way more than the \$10k you listed

below, for a commercial studio (not an upgrade from an Audiomedia, or PT001).

e.g. A friend of mine went to Mix Plus way back a few years after it first came out, with ProControl (I believe):

total was \$40k, and that was considered a modest PT rig at the time - that followed his O2R, ADATs, multiple consoles, etc.

I don't know if/when he went HD, but that's even more on top. I'm also not sure if the \$40k included

any plugins at the time - probably some basic plugins but I'm sure he expanded/added to it down the road.
