-----090906070505070201070104--Thanks Edna... I'll try that. I seen the normalize button,  
but was unsure

how it operated. In fact, I wished I known this option a few days ago...  
would have saved me lots of time. I was trying to remix/remaster some older  
projects and songs.. and it was very time consuming to individually adjust  
each channel. Thanks again... :)

amazed at what all it can do. I did try out a Roland unit one time but was  
disappointed with the sound - dead, cold, etc. I am using Paris to track  
vocals and synth mainly for church related things, BG tracks, CDs, etc.  
Also for writing my own stuff - I play kybds/sing. Used to play in bands.  
I got Paris for the sound. I prefer analog, and Paris was touted as the  
nearest to that. It certainly wipes the floor with the Roland, IMHO. And I  
love the editing features. At the moment I am experimenting with mixdowns,  
trying to get the exported stereo files to sound as good as the original mix

> Is that my understanding?

Well, at least as good. And hopefully better. At this point it is losing some quality. I am doing most of it in Paris and some in CEP. I am getting plenty of volume, avg RMS level at around -12db. It really distorts the boombox, computer speakers, and my truck speakers, so I have to turn it pretty low. I'm going to try more eq to get rid of some of the hi/lo frequencies that are not important to the mix.

To be honest, that is exactly why I am going  
> through all my projects again and remastering them... I tried to do all my

> to listen. As I read one article, you certainly don't want little suzie's boombox to be farting... lol Sorry, but I found that ironic and very true.  
> My normal routine is to find a great mixdown in Paris with decent studio speakers (believe it or not, I currently use Behringer B-300's for this).  
> Then, I use the old CoolEdit Pro and convert the mixdown to a .wav. In CoolEdit I use a touch of iZotope Ozone plugin (which has a great equalizer, maximizer, etc.) and then convert to 16 bit in Cool Edit.

So you bring in a 24bit PAF mixdown file into CEP? I tried that with a 16bit PAF and CEP played it too fast, even though is said SR was 44.1Khz?? Same file as a Wav plays correct?? Anyway, I havent tried recording at 24bit in Paris yet, maybe it will be better.

Burn it and listen  
> in the car, the truck, the boombox, home stereo, even

put it in the DvD player  
> and listen through the home theatre system. Of course, to be honest, you'll always find things to adjust or wrong..

Yep, every time I hear the mixes I will change things. I am also bringing in other commercial CDs into Paris for a/bs. I'm a very long way from getting anywhere close to these.

EdnaThanks EK, I know about all of that but I was talki
