at
generator I could use instead of a click. I run Cakewalk Pro 9 on a second

PC synced to Paris via SMPTE. I then send a midi note from Cakewalk to a D4 drum module and use that as my click sound back into Paris. Is there an app I could use that could sync to time code where I could chose the beat, tempo and just start trackin, no F__in around...!! Then, with the same timecode, I could go back to Cakewalk if need be, punch in the same tempo and work on midi tracks/sequences, etc.

Thanks much and Happy Holidays from the great white north.

Rob AThis is a multi-part message in MIME format.

anuel Hall (spelling is off I'm =
sure).

I'd second Bill's recommendation on the Christian SM globe, its =
pretty cool.

The Museum of Fine Art is wonderful, as is the Isabella Stewart =
Gardiner

art museum (google for more info). As I recall, they moved the =
villa/museum

from Italy. The science museum is also a nifty experience. They have =
a

show on electricity that's "hair raising." Oh yeah, and the aquarium. =
In

fact, I'd recommend the aquarium over the science museum. In the =
center

of the place is this three or four story (you guessed it) aquarium. =
Quite

a sight. It (and the science museum) have and are located on, their =
own

"T" stop. =20

Hope this helps. May your explorations rise up to meet you!

MR=20
