DJ,

I just got back from a gig and the beer is more inviting than the machine room. I will asap though. An early gig tomorrow at http://www.chathambarsinn.com/dining/beach_house_grill.asp and a wedding on Saturday. =20

Either Thursday night after an early evening with friends on the cape or Sunday after I recover from the rest of the week. =20

Good news, only two successful sessions this week already.

"DJ" <animix _ at _ animas _ dot _ net> wrote in message = news:468c70a8\$1@linux...

Tom,

Did you lose the 442 yet?

"Tom Bruhl" <arpeggio@comcast.net> wrote in message = news:468c700a@linux...

John,
Magma here, IRQs are very happy.

Deej,

Ya terminated for sure. To try the original setup with my mobo means WC in series to mec A then to mec B. Silly but that's the only way it worked. David has the same issue with this ASUS mobo and a Lucid.

Never a dull moment here in Paris on 4rth of July.

Thanks guys,
Tom

"John" <aint@itawful.com> wrote in message news:468be028@linux...

What is you motherboard. You have 3 eds cards? IRQ conflicts are = the=20

biggest problem. Make sure you don't have conflicts which is damn = hard=20

with 3 cards. You may need a magma for that many cards. I think = used=20

they are \$250 or so.

>KM84's are probably the best mic on the planet for acoustic guitar,
piano, and drum overheads and they do a lot more than those things
extremely well. I sold my stereo pair last year because they had
gotten so valuable and I really wanted a National Tricone...

BTW, I got one repaired (bad amplifier, not capsule) by Neumann for
a couple hundred, so the repair may not be as expensive as you think.
