Seems the super twin was made in 1975-76 according to the "Fender Amp Field Guide" Website <http://www.ampwares.com/ffg/>

I found this chassis lying in the middle of the road and spent almost a year trying to find the owner. Late last year I had it checked out by our local tune amp tech (it works) and decided to sell it rather than refurbish it.

1) 8 IN

- 1) 8 OUT
- 1) MEC
- 1) C16
- 1) EDS card

All cable's included Manuals 2.1 software is available if you need it.

Buyer to pay shipping. Would rather sell entire package.

Pay pal ok \$1400.00

You can call me at 586 855 0139

Thanx DominicHey Rick,

It's Friday again. Are you still drinking?

Any decisions on the 8-in for an 8-out trade?

Thanks & have a great weekend!

Thanks,

David I am freaking out here. I had already used the UAD multiband for mastering some dixieland jazz tracks and was really pleased with it. Tonight I am working on a "Lincoln Park/Coldplay-esque" type of track and the vocal, although it was recorded fairly well[not by

me..:-)]has a few frequency warts here and there, mostly low mid proximity stuff. I had it sounding pretty good with conventional compression/eq, but just for grins I took those off and put the Multiband on it. I freaked out! I've used multibands before, (Waves linear, and DB)but this just made me not believe what I was hearing. It sound really natural and evened out the vocal in a really pleasing way. I'll probably go to bed and check it in the morning, just to make sure I'm not crazy, but I'm loving this thing. Rodoops..wrong forum. Never mind. See you on the regular one>
