XP  
if you're using the XPdrivers that someone here have built.

The eds compressor as an insert in a mono channel doesn't really work and also all the presets are gone.

At the same time everything works as a master insert (even if the preset are still missing). No good. I also tried that suggestion to put compressor at master inserts

and the at channel inserts but it didn't work.

Anyone else of any ideas please?

A BIG THANKS to all that help this great sounding system to still work. 2 MECS, 3 EDS cards, P4 2GHz, XP pro.

Windows? Thanks. Hey Don, glad you found an outlet for your sincere opinions and beliefs.

Quick reactions: To quote Bob Roberts "The times they are a'changin' back." ;^) While I don't think Thomson's suicide defines an era, I agree that decades don't define eras either. It bugs me when articles attempt to cram an "era" into the arbitrary numerologic convenience of a decade or century. It's a shame about the drug problem then and now, to an extent a spinoff of militarism and irrational drug policy if you look into it. Drug abuse has wrecked a lot of lives. Science is a method, not a philosophy. It is all about positing theories and then thoroughly testing them to reach conclusions that are always up for further challenge. It's a collaborative discovery process. Anyone, who starts with preconceived conclusions looking only for evidence to support them isn't doing science. On the philosophy side, human worth is held up by most religious and non-religious people alike, although some of both were able to somehow rationalize bigotry, slavery and genocide throughout history. Good luck with your book, you're off to a good start with the blog.

Cheers,

All the above have been tested and sound good to very very good....

If anyone wants them I can send them while they are free anyway...

Regards,

DimitriosWith Emu 1820 and EmulatorX, their software sampler, it have all the Proteus sounds as far as I can see.

---=\_linux4338841d--need more info..

what operating system and what version of Paris are you on?

What it sounds like is that you are on WinXP and haven't correctly installed the effects subsystem.. but I'd need to confirm the info on your setup.

Dimitrios,

I tried once to get mono reverb but couldn't get it  
to work. Do you have the method on paper?

I'd like to be able to use that from time to time.

Have you done the obvious ?  
Uninstall everyting and reinstall ?  
Also did you pay the needed attention for subsystem effect ?  
You know the minimum.exe file ?  
It must be on Emu folder.  
It is different for 2.x and 3 paris versions, be careful with that.  
On aux menu do you see the cables in and out ?

This is the link for the dynamics/mastering free effects for PC and Mac.  
You can do similar search for reverb and other effects on kvraudio site.

I have tried this but it has 44 samples of latency thats why I dropped it.  
I wanna use as much 0 latent plugins as I can to avoid nudging things.

Also cleaned and reseated the daughter board as Rob Arsenault mentioned with no changed.  
The EQ section works on the channels, is it seperate from the effects system on the board

Now I have chorus on insert !!

How did you find that ?

I was looking everywhere for some info but nothing about chorus....

I am thinking that maybe it was there from the start but I somehow missed the obvious...

Regards,  
Dimitrios
