>>Hey DeeJ,

My studio is in Hollywood and I'm available on Tuesday. I'd love to meet for lunch with Dave too if it works. Monday is also a possibility, but I'd have to move some things.

Is there a way to keep Cubase sending midi when it's not on top or just minimized? Every time I use another program (TX7 editor) Cubase stops sending midi. The transport stops too. If I minimize it the same thing happens.

-----=_NextPart_000_00A3_01C63B59.190D2DA0--no, i'm using the 4x4 for the m24 controller (3 I/O's) and one for the
keystation. actually it's connected to both the mac and a pc via usb
to allow sharing of hardware.

-----=_NextPart_000_0143_01C63B9D.8BE51BF0--The Express will convert the incoming
SMPTE to MTC that Cubase will
lock to. Simply tell Cubase which MIDI port the timecode is coming in on.

David.
