After installing a network card it showed up.

Repeating the process using the same PCI slot with an eds card made Windows hang.

Are all my EDS cards toast? They weren't a few weeks ago? Even when the Mecs weren't showing up the 442 allowed 5 EDS cards to work in the Magma.

What the heck?  
Tom

"Tom Bruhl" <arpegio@comcast.net> wrote in message =  
news:471c381e@linux...  
Mastercard=3D0 was correct also.

I am going to try a clean OS with Paris on it too if the PCI slots are still working.

Don't bother wishing me luck. There's none to be found.  
Tom

"Tom Bruhl" <arpegio@comcast.net> wrote in message =  
news:471c3137@linux...

Mike,  
I removed the default project and .cfg from the folder as you =  
suggested.  
Now the computer won't even boot with either of three eds cards =  
installed.  
No Magma, no word clock, no word clock line in the existing config.

I'm going to check with a network card to see if the PCI slots are =  
burn't.  
I tried three different ones with the eds. The one time Windows =  
worked  
with an eds card, the eds card didn't show up in device manager. =  
That's=20  
probably why.

There is some serious funk going on over here. Maybe mobo? If this =  
is the  
case I give up. It's not worth any more BS to me. There is no =  
person  
in my neighborhood to walk me through this. My tech helps me  
but the problem seems to be from the ground up. I'm guessing 3-4  
things still so wrong that nothing makes sense.

Cubase is looking more and more inviting, learning curve and all.  
Tom

"Mike Audet" <mike@....> wrote in message news:471bcb77\$1@linux...

Hi Tom,

I have an idea.

Try removing UseHouseSync=3D1 from the paris.cfg file.

Next, remove your default project from the program files\emu\paris =  
pro folder.  
=20

Let me know if it makes a difference.

Good luck!

Mike
