>Thanks Rod, I have the Neve, so the Helios is like the big 1073 as far as
latency?

I'm curious what ones you think are different, I know the little 1073, la2a.
1176 are the same, and the pultec is different.

Is the helios more musical than the 1073? That thing is aggressive,

ch that such tests must be allowed. The ruling was scheduled to take effect June 1, but the Agriculture Department said Tuesday it would appeal, effectively delaying the testing until the court challenge has played out.

Mad cow disease, or bovine spongiform encephalopathy, is linked to more than 150 human deaths worldwide, mostly in Britain.

Three cases of mad cow disease have been found in the United States. The first, in December 2003 in Washington state, was in a cow that had been imported from Canada. The second, in 2005, was in a cow born in Texas. The third was confirmed last year in an Alabama cow.

The Agriculture Department argued that widespread testing could lead to a false positive that would harm the U.S. meat industry. U.S. District Judge James Robertson noted that Creekstone sought to use the same test the government relies on and said the government lacked the authority to restrict it. James, if a person today wants to say those negative words they can, BUT they must know that there is a consequence in saying them.

Yes, freedom of speech, but beware of the consequences when spoken.

WASHINGTON - The Bush administration said Tuesday it will fight to keep meatpackers from testing all their animals for mad cow disease.

The U.S. Department of Agriculture tests fewer than 1 percent of slaughtered cows for the disease, which can be fatal to humans who eat tainted beef. A beef producer in Kansas, Creekstone Farms Premium Beef, wants to test all of its cows.

Larger meat companies feared that move because, if Creekstone should test its meat and advertised it as safe, they might have to perform the expensive tests on their larger herds as well.

A federal judge ruled in Mar

>We bought the "more cowbell" kit at GC for one of the guys in our improv comedy troupe who had made one too many cowbell jokes. Gave it to him right before we went on stage.

We opened by asking for a request for a song that he should play. By golly, he played right along even though he didn't really know how to

play cowbell (or any other instrument) and he didn't know the requested song. Which made it that much funnier as he tried to play the song anyway, entirely on cowbell. Great start to an improv set. :^)

There is nothing for free! Health care is not free. Somebody has to pay
for it. That would mean much higher taxes, so be prepared to pay for it.
The tax the rich lie is designed for the suckers. The middle class ALWAYS
end up with the bill!!!

Oh yeah, we're dumb, we can be trusted to invest. Just keep buying that
liberal line! I'm talking about choice, but you don't get it. So hold hard
to you party lines.

Go research what is going on in Taxes where they opted out of SS, and see
what they are getting on there returns.

"Paris style" plug.

pab"DC" <dc@spammersinhell.com> wrote:

I couldn't use that pedal... 'cause on everything I do the "auto-suck-knob" function overrides everything anyway.

lol

:DYou're using the demo version - that's what it does in demo mode. If you paid for it, and it's not working right, maybe you need to reload it with your authorization code... if you don't have it or can't find it, e-mail Voxengo Support and ask Aleksey to help you - he may even get back with you over the weekend; he's usually really good about stuff like that.

Neil
