Hey guys,

I have an older USB 1.1 comp (PIII) that I bought a new  
PCI - USB 2.0 card for. Will it ever perform at the 2.0  
standard in this older comp? Will I need to download  
drivers to allow 2.0 speed? No drivers came with it.

It's a Rosewill RC 103 5 port card.

I was just going to put it in and see what happens.

Whadaya think?
