Tyronel still have an ADAT card for sale. \$225 + shipping. If you will send me a blank front cover it will be \$210 + shipping. It is black and as far as I know works fine. I have no way to test it. Sorry. JimSold the DATPort.

C-16 is still available.

Wavelab on this rig, slap another RME card and a UAD-1 card in there and
then stream my tracks from Cubase to Paris like I've been doing but I'll
send the digital output from Paris to the 3rd computer running Wavelab and
I'll have W(ever)TF I want for mix bus summing.....(doesn't Gene
already do this.....I think he does)

I now have this 4 x 6 picture framed and sitting on my monitor bridge:
<http://despair.com/insanity.html>

Cheers
DeejOops.....sorry....wrong forum.....
