>Hi James,

They really need to have a single socket board that will take a quad core. There is such a huge gap in choices. For most people the 8 cores are just total over kill.

I'd like to see them do a small mid tower and give the IMac some balls.

All it is a laptop in a bigger monitor. They should at least put a fricking express slot on it.

They could easily put a desktop based chipset in it instead and use desktop quad cores instead of laptop cpu. Single socket Quad cores especially the new 9450 Penryn based CPUs are awesome.

They have more way more horse power than th
