-----=_NextPart_000_0027_01C66876.0699CC10--I think it's performing an "undo". Did you move that track before you mixed.

I've never had it alter the timing on tracks after alt backspace, but I have had it perform an undo at the same time. Work around: don't alt backspace mixes, just name a new mix and delete the old later in windows.

tes-composers-entirely/Tom,

Can you believe I wasn't hip to the whole restore thing! Looks pretty useful; of course my system restore was turned off so there were no restore points to go back to. I turned it on, but that's not much help with my current problem.

Thanks much though; you probably helped with all the future problems I get into.

Pete,
Well I wouldn't want to use today's config for
a restore point that's for sure. There wasn't one
way way back? Months ago before you turned Restore off?
You know you can turn back the pages on that calendar right?
Go back another month or two. Mine saves the last day of every month.
I guess you don't have a cloned C drive either huh?

I'd go back to undoing everything you remember doing to
add that EMU card. Uninstall EMU's drivers, remove all
scherzo drivers that aren't being used. Maybe even uninstall
all the Scherzos and add one card at a time fresh. Let Windows
look for drivers.

I'm not much of a tech. I'm sure Aaron, David or DJ could fix this
for you more quickly.

Good luck,
Tom

>I have been living with Logic 4.7 as it was PC based. Along with 4.7, I am
using an Emagic Unitor 8 as the midi interface. I am now interested in upgrading
my sequencer rig. I understand that Logic 7.1/7.2 provide a feature to lock
to video within the app. My questions are:

1. Should I go with a Mac G5 (if so, know of any great deals out there?)
2. Are there any PC apps. that can handle this as well?

I am searching the web as I'm posting this.

Thanks?

Tyrone Corbett I guess I'll need to invest in an ADAT card for Paris to keep it in the loop
as well?

Tyrone

Sigh.

I feel the same way after having used Paris and SX side by side for over two years now. Paris is just so much easier to track with, to quickly nail the sound I'm looking for and is so forgiving when mixing. I use RME and Mytek converters from time to time, but to tell the truth, I *choose* to use the Paris converters more often than not these days. With an external clock, they sound just as good to my ears.
