lection and delays, not the standing waves from
>>the subs.

>>

>>DC

>Well.....I'm not the only place they record. there are other very good studios here and after 6 years here (I still can't believe I will have lived here 6 years on Dec. 20th) I'm still "the new guy". They do a lot of work at Airshow in Boulder too. the Broke Mountain Band did their first demo here that got their foot in the door of the live festival circuit and I've got a few Gbits worth of tracks of original music by these guys in one of their incarnations as the Wayword Sons. Robin Davis played mandolin on all of these tracks whereas John Stickley plays guitar and they are both freakin' amazing.. Nowadays it seems that Robin has switched to guitar and John has taken up the mandolin. It must be nice to be so talented that once you master one instrument and get bored with it, you can pick up another one and master it within a year.

I'm just really proud of these guys. Between these young pickers and guys and my friends Time Sullivan and Gary Cook, I feel very lucky to have this level of talent available for sessions. It's really all my wife's doing. She used to live in Boulder and Bennie Galloway and some of the older bluegrassers around here backed her up on live gigs back in the early 90's. When we got here, they had all moved down here too and they have subsequently hooked up with these younger guys who are just incredible.

What scares me is that I'm actually starting to really like bluegrass music. There's a whole vernacular to it too. Some of the descriptions they use in the studio are pretty funny.....stuff like
"wow!!!!..cool!!!!.....that lick sounded really lonesome"

;o)
