t like to know,
RichI seem to remember that some of you using XP had no problems with ADAT transfers, while others were having difficulties. I'm still on ME with Paris. One of these days I'm going to transport over to XP. What is the state of ADAT with XP in Paris.

Richexplain to my why this is better to the point of ridiculing the other possibility? it's not that i'm a huge proponent of the other view, i just find the absolute dismissal of it quite funny given the acceptance of another theory to be soooooooo much more valid. please enlighten me.
