00.00 for

the Mojave 200 which is based on roughly the same circuitry/components.

(I'd be open to a little negotiation on this)O'Yeah.....mic #2 also has the same cardioid Peluso capsule as mic #1.

es and one that got many many upgrades
!

I have changed and bypassed the power supply and this mod has given adipro
the missing midrange clarity !

Even my 6 years daughter could hear the difference...

I also changed the first 4 channels on the AD section to 6172 great opa and
the last 2 channels on the DA section to 6172 again !

The da section with 6172 and some cap bypasses is a fantastic sounding da
,you can hear the difference from channels 1-6 right away.

The clarity in detail is most evident !

So this is a fully working (48khz version) adipro that sells for 999\$ including
shipping.

If you are interested let me know.

Regards,

DimitriosWould you trade ?
