, and you?

>><http://www.polesoft.com/refer.html>

>>

>>

>If you have more than one Control 16, remove all but one. I understand that aggravates and accelerates the degradation of stability more quickly. You might also look backwards at posts about a month, I think there were some threads on disabling the second core in some way... I'm afraid I did not keep track of them as I am still on an old but stableAMD1900+, but surely someone here did.

AA
