-----040608010408030501010608--One thing to consider... in the last 3-4 years, Mackie has moved

manufacturing to China. This means that the RCF drivers and Italian amp module that were once used in the '450 have been replaced with Chinese counterparts that are of lesser quality... I know, I used to fix those as well... (no longer sell or service Mackie products)

>Hi Lamont,

Yes the Nuendo forum has become that. Fredo is a nice guy in person but does come off bad sometimes on the forum. But I think any one would have a tough time being a forum moderator there at this point with some of the people on there. Most everyone actually offers help have either left or just stop posting in fear of the people with the personal vendettas against SB or someone at SB. I really think they need to do 2 things. Crack down on some of ht the bully types and have more direct Developer communication rather than having spokesman do the communication. Of course they also need to have a better manual and better online and phone support but it seems like all the software companies suffer from that. Steinberg's main bad habit comes from the lack of communication rather than out right false or misleading information at least.

Does me=20
good to hear that.
I would like nothing better than \$50k =

audio=20

gear in my house, but that's half as much as my house is worth,
so =
that's=20
not gonna happen. I'd love to have a full set of the =

surround speakers, all driven by really beefy =
class-A
amps.

But I=20
completely appreciate that level of goodness. I've often =
gone
to=20
high-end stores and played with the goodies, and gone =
home
depressed and=20
insanely jealous.

I'm also glad to see someone realizes that =
home=20
theatre sound is every

reproduction. That's=20
one of the things that
is staring me in the face when we get HDTV =
later=20
this coming year -- I
want the surround system to sound just as =
musical as=20
the stuff in my
studio. I hate the systems that are nothing =
but=20
sizzle and boom --
you don't impress me with a subwoofer that just =
rumbles=20
and overpowers
everything else. Make it smooth, make it =
musical, and=20
THEN give it
balls.

But then, the people who typically buy =
the=20
biggest TV that will fit
through their door, regardless of how tiny =
the=20
room is, are also the
ones who buy the biggest, baddest sub their =
utility=20
service will feed,
just so they can invite the neighbors over, put =
on some=20
action movie,
and go, "Listen to THIS!!!!!" When I go listen =
to=20
someone's system
and all you can hear is LF rumble, I want to whack =
them=20
upside the
head.

That's wacky. I bought a DVD player/vcr combo @ sams/costco last year for 49 bucks and it has a tuner. Maybe they went for more cost savings and started eliminating the tuner, but I don't know how they could get any cheaper.

That would be DJ DJ Deej..

Now, if I could just grow a mullet.....

...I just bought an LG Electronics DVD/VCR recording combo for \$200...no
tuner...the \$280 model has a tv tuner..... BUT they will all be useless
without a Digital converter of some sort after next year when analog TV goes
