"Enable write caching on =
the disk", remember to UNTICK them. You can do that on your audio =
harddisks only or and on your c too.

3) Remember to use "background =
services" and System cache for memory usage.

4) Now DISABLE DX support =
on your Paris cfg or you can disable this on Project Paris window =
....

5) Use the vst version of any plugins you have .
If you happen to have =
waves plugins there is a neat free audio program
that can make vst =
individual plugins from waves waveshells.

6) Put all your vst's on root =
again.
That means to REINSTALL your vst plugins in the =
directory: c:/VST

7) Use your Chainer vst wrapper =
to open your vst plugins.

8) You can make a default project with all =
your audio tracks having a
chainer already loaded where inside can be =
faderworks too

9) If you h
